

### **PDU: POWER DISTRIBUTION UNIT**

As the manufacturer/exporter of low & medium voltage electric equipment, we have developed the new series of PDU sockets and socket modulators, which is one of power distribution products for the usage of distribution unit, power protection, electrical distribution systems, power distribution box, power distribution unit, power distribution solutions.

We have the strong mould design and production ability to support the material of our Industrial plugs & sockets, Power Distribution Unit Sockets--PDF Sockets, and other kinds series, like: Desk Sockets, Floor Sockets/Ground Sockets, Ceiling Sockets.

### **Specifications of PDU**

- (1) Types for Different Countries: France, UK, Italy, US, IEC, Chinese standard, etc.
- (2) Installation Direction: vertical 19" mountable units / horizontal 19" mountable.
- (3) Adopted PC/ABS alloy, hot change temperature reach to above 120 degree, fire-retardant characteristic accords with UL94-V0 standard.
- (4) Certifications: GS, CE, 3C, etc.

## PDU Sockets Manufacturer in Ningbo, China

UK standard PDU sockets  
Germany standard PDU sockets  
USA standard PDU sockets  
Universal- standard PDU sockets  
French standard PDU sockets  
IEC320 C13 standard PDU sockets  
China standard PDU sockets  
Raised Floor Socket,Ground Socket  
Desk PDU Sockets  
PDU Sockets Modular, PDU spare Parts

### Defination of PDU Sockets

Large industrial units are used for taking high voltage and amperage and reducing it to more common and useful levels. A 240 volt circuit (120 volts x2 plus neutral and ground) has two legs at 120 volts. A distro switches and provides circuit protection. PDU also refers to what amounts to a well- constructed power strip suitable for datacenter use. Two basic varieties exist. One of the challenges in selecting PDUs for a datacenter application is to balance the relatively high cost of a switched

### Specifications of PDU Sockets made by Ningbo-Electric-Pneumatic

- (1) Types for Different Countries:France Type PDU, UK Type PDU, Italy Type PDU, US Type PUD Socket, IEC Type PDU
- (2) Installation Direction: vertical 19" mountable units / horizontal 19" mountable power distribution units;
- (3) If functional modules are adopted PC/ABS alloy ,hot change temperature reach to above 120 degree ,fire-retardant
- (4) Certifications for our PDU Sockets Supplier : GS,CE,UL,3C;

Input plug and output sockets of PDU sockets, Power Distribution Unit sockets.
